Colors reproduced here may vary somewhat from actual product colors. Samples are available.

*White Painted Extrusions - All other colors are multi-layer acrylic laminate.

The exterior multi-layer acrylic laminates use several layers to establish a finished look unavailable from paint. The color looks deeper and the top coat helps provide outstanding colorfastness and exceptional weatherability. The texture establishes a richer look than any flat surface. Weather King now offers the laminated finish on all our products so that you can coordinate your home with your choice of color. The finish is easy to clean with standard cleaners and will retain it's beauty for years.

Please look at all our products and you will understand why we say-

“Weather King For the Very Best!”

Our Storm windows & doors are now offered in White and all 11 acrylic laminated finishes. The acrylic laminates give the durability needed and with the unique texture, have significantly more appeal than a flat painted surface. The exterior of the door and the z-bar frame are laminated in the color with the glass & screen frames laminated in black to finish the designer look and all interior surfaces are white. Kick panels are painted to match.

Select from any of the styles and outfit your door with any of the new expanded hardware to personalize your new door.
