Weather King's 2011 Northern Energy Star Solution...

Our New Dual Glazed Windows
featuring 2 Lites of Low E Glass
with Duraseal and Argon Gas

Designed to exceed Energy Star Northern Requirements, **our Low E** is simply **THE BEST** for **cold-weather climates** compared to major manufacturers, Low E that is designed for Southern Climates.

Comfort E-PS captures more free solar heat.

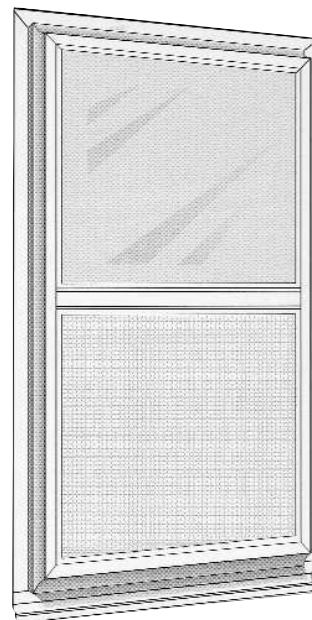

“Weather-Break” Insulating Glass

with it's High **SHGC** saves significant money
compared to Low SHGC Energy Star Windows.

Our **Storm Windows** can now be ordered
with **Low E glass** to give the benefits of
Low E for **Storm Window** applications.

The United States Department of Energy is
promoting programs for New Storm Windows
with **Low E glass**.

Storm Windows & Doors are now being
manufactured in our main plant to provide
faster service to the majority of our customers.
